

SUBMISSION FORM FOR BLACKLEGGED TICKS

Sample identification results are sent out by e-mail. The results are used to identify locations requiring further surveillance, which assists in identifying Lyme disease risk areas. Contact information is requested to aid in planning future surveillance activities. **Results are intended for surveillance purposes only and are not meant to assist with diagnosis or treatment of tick-borne diseases.** Additional information can be found on the Manitoba Health Lyme Disease website at www.gov.mb.ca/health/lyme or by emailing ticks@gov.mb.ca.

Please find enclosed tick(s) sent to you for species determination and possible detection of disease-causing agents.
